Preface	v
About the authors	vi
How to use this book	vii

1 INTRODUCTION TO FILM, TELEVISION & NEW MEDIA 1

What is meant by 'moving-image media'?	2
--	---

UNIT 1: FOUNDATION 9

2 LANGUAGE CODES AND CONVENTIONS OF MOVING-IMAGE MEDIA 10

About language codes and conventions	11
Genres and codes and conventions	15
Camera codes and conventions	18
<i>Mise en scène</i>	32
Editing codes and conventions	38
Sound codes and conventions	45
Music in moving-image media	49
New media codes and conventions	52

3 INSTITUTIONS AND MOVING-IMAGE MEDIA 55

About media institutions	56
Global media organisations	59
Regulation of the media	63

4 TECHNOLOGIES OF THE MOVING-IMAGE MEDIA 69

About technology	70
Evolution of technology and audience engagement	72
Technologies and the medium	80

5 MAKING AND RESPONDING – FOUNDATION 87

Part A: Production – the basics	88
Part B: Producing film trailers	114
Part C: Producing music videos	117
Part D: Film reviews	121

UNIT 2: STORY FORMS 124

6 LANGUAGE CONVENTIONS IN MOVING-IMAGE MEDIA STORIES 125

About story	126
Cause and effect	128
Three-act structure	131
Point of view in stories	139
Character	142
Setting	148
Multiple story lines	150
Structuring time	151
Digital games and story	155
Digital games and movies	157

7 AUDIENCES AND MOVING-IMAGE MEDIA STORIES 159

About audience engagement	160
Audience expectation	164
Audiences and different platforms and contexts of reception	167
Ways audiences 'read' texts	172

8 REPRESENTATIONS IN MOVING-IMAGE MEDIA STORIES 177

About representation	178
Realism and representations	183
Representation and real life	185
Representation of gender	187

9 MAKING AND RESPONDING – STORY FORMS 194

Part A: Production – for story	195
Part B: Producing genre stories	214
Part C: Australian stories on film	226

UNIT 3: PARTICIPATION	237	UNIT 4: IDENTITY	328
10 TECHNOLOGIES AND PARTICIPATION	238	14 REPRESENTATIONS AND IDENTITY	329
Technology and participation	239	Introduction to identity	330
Platforms and participation	242	Expressive film movements	335
Interactivity	251	Documentary film movements	339
Technologies and contexts	254	Cult films	345
		Auteurs	349
11 AUDIENCES AND PARTICIPATION	259	15 LANGUAGES AND IDENTITY	354
How contexts and purposes affect participation	260	Expressive productions and media artists	355
Uses and gratifications theory	263	Creating expressive moving-image media artworks	365
Fans and participation	266	Documentary productions and media artists	367
Audiences and participation in multi-platform media	270	World cinema	371
Audience participation – individuals and groups	273	16 TECHNOLOGIES AND IDENTITY	387
Emerging interactive moving-image media	276	Narrative film movements and technologies	388
		Directors and technologies	399
12 INSTITUTIONS AND PARTICIPATION	283	17 MAKING AND RESPONDING – IDENTITY	404
Institutions and the economic context	284	Part A: Ideas for stylistic film	405
Public and private media organisations	286	Part B: Production for stylistic film	413
Australian television organisations	288	Part C: Writing reflective statements for stylistic film	433
Big data and media institutions	292		
Citizen journalism	297	Glossary	441
Barriers to participation	300	Index	452
13 MAKING AND RESPONDING – PARTICIPATION	303		
Part A: Production – for multi-platform	304		
Part B: Making pilot productions	311		
Part C: Writing case studies	317		

ABOUT THE AUTHORS

Dr Colin Stewart is Head of Department Visual Arts and Media at Kenmore State High School. He has taught senior secondary Film, Television and New Media and related junior media subjects for more than 30 years, and tutored pre-service media teachers at two universities. Colin has a doctorate in media curriculum, and has been involved in media syllabus development and curriculum writing at state and national levels for more than 20 years, including for the 2019 FTVNM syllabus.

Kylie Agnew is currently a QCAA panellist and senior Film, Television and New Media teacher at Mansfield State High School. She has taught in regional and metropolitan areas, and has been involved in curriculum resource development for the Australian Curriculum: Media Arts strand. Kylie has also acted in a curriculum advisory role in the development of the 2019 FTVNM syllabus.

Matthew Beattie is senior Film, Television and New Media teacher at Indooroopilly State High School. He has worked in various roles in the media industry for almost 20 years including film criticism, content production, and editing, advertising and motion graphics design. He is currently studying a master's degree in Film and has also been a presenter at Australian Teachers of Media (ATOM) conferences on numerous occasions.

Aimee Gust is acting Head of Department – The Arts at Brisbane State High School, District Panel Chair for Film, Television and New Media, and an executive member of ATOM Queensland. She has been involved in several curriculum writing teams, including for the 2019 FTVNM syllabus.

Darren Sinclair is senior Film, Television and New Media teacher at Kenmore State High School, bringing industry experience from documentary and feature film, television series, advertisement, education and corporate productions, along with freelance experience in camera, sound, editing and set construction.

AUTHOR ACKNOWLEDGEMENTS

The authors would like to thank their families and friends for their help and support during the writing process and all that it entailed. The incremental learning from colleagues in Media Studies, other disciplines and past careers is also gratefully acknowledged as contributing to the knowledge base we have attempted to share with others. As authors, we want to thank the Cengage staff involved in the project for enabling us to publish this book as a compilation of the most relevant content for the implementation of the Film, Television and New Media syllabus. Thanks to them, we can deliver that content to our students. To our current and future peers in the statewide 'media faculty', we thank you for meeting the challenge of media literacy for the wider population at a time when global economics, democracy, and the value of individual thought may depend on it.

HOW TO USE THIS BOOK

Nelson Film Television and New Media is a complete, two-year course book written specifically for the QCAA Film, Television and New Media syllabus. It is the first textbook specifically written for the Queensland Film, Television and New Media syllabus. This authoritative text delivers content knowledge for deep understanding and skill building for students who wish to learn about the key concepts of both production and theory.

The highly visual text has been written by an experienced team of teachers who have been involved in every stage of Film, Television and New Media curriculum and assessment. All syllabus unit subject matter, objectives and cognitions, and key concepts are matched and addressed in detail throughout the text. Comprehensive, yet flexible in design, the text is suitable for a variety of individual school teaching plans.

Structure

Chapter opening images

The chapter opening images help to navigate the students through the text. Teachers can use the images as stimulus for class discussion and pre-testing of knowledge and understanding. Each chapter heading refers to the key concept that is foregrounded within each unit.

Within the text

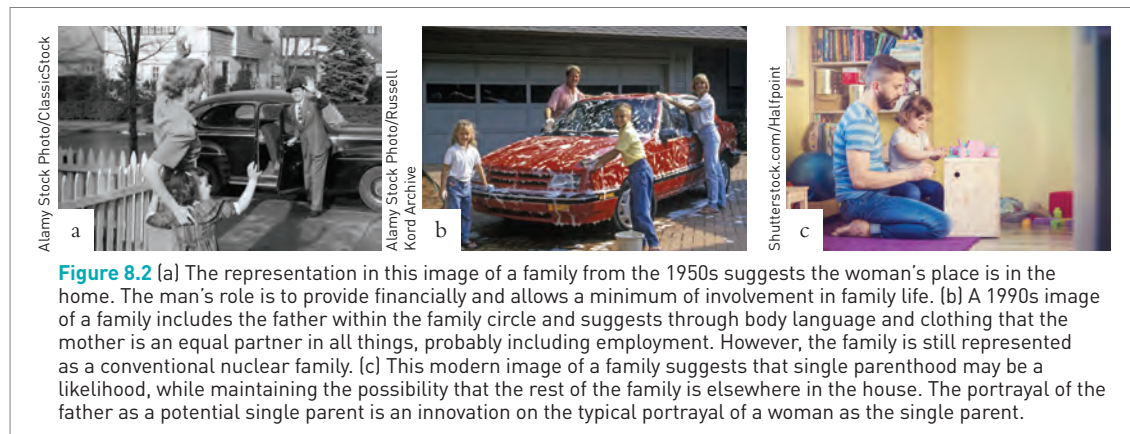

The content has been broken into manageable chunks of information for students and comprehensively covers the syllabus unit subject matter. This suits a variety of teaching and learning styles, but in particular the 'chunk and chew' approach, shared in-class reading and independent exploration via the flipped classroom approach. Important information and relevant quotes feature in breakout boxes. Icons on the page indicate a weblink (as a hot spot in the NelsonNet book and on the weblinks page on NelsonNet).

Key concepts and subject matter

Chapters are based around the five key concepts of the Film, Television and New Media syllabus and they cover all the required subject matter in each unit of the syllabus. The key concept approach enhances flexibility and allows the textbook to provide suitable content for a wide range of individual school programs. It also allows for easier access by students when they are studying by themselves.

Images as a learning channel

Nelson Film, Television and New Media features a range of up-to-date and relevant images. Each image is accompanied by an extended caption that provides the students with additional information to enhance and deepen their learning experience.

8.4 ACTIVITIES

- Use the Bechdel test to assess some of the top films released this year. Respond to the areas of investigation in the table below.

ANALYSE	APPRAISE	EXPLAIN
Analyse the films, dissecting and interpreting the speaking roles to evaluate them using the Bechdel criteria. Make a judgement as to whether or not the films pass the test – and whether they pass the test fully or pass just some or none of the criteria.	Appraise the films according to whether they have worth independent of the Bechdel test, and whether women still play significant roles on-screen or in production.	Explain the reasons for your decisions, giving additional information that demonstrates the process you went through, and illustrate with examples.
- Try conducting a 'reverse Bechdel test' in relation to the portrayal of males in films, television programs and video games. Analyse recent movies, but also consider the following movies as possibilities: *Psycho* (1960), *The Terminator* (1984), *About Last Night* (2014) and *Juno* (2007). Appraise the worth of the Bechdel test as a tool that can work in a variety of situations by systematically examining its applicability.
- Construct a collage charting changes in either the male action hero character in films or the representation of the housewife/mother figure in advertising. You will need samples from each of the key eras of media development: the pre-feminist, feminist and post-feminist eras. Explain the changes in labels attached to the collage, giving additional information about each stage.
- Choose one of the following topics and discuss it in pairs.
 - Has the advertising industry overreacted in its portrayal of men? Consider representations of men in the kitchen, men as sex objects and men portrayed in beer ads.
 - To what extent has the exploitation of women's bodies in advertising decreased since the pre-feminist era? Or has it become worse?
 Explain your viewpoint to your partner, clarifying your perspective with additional information and specific examples. Present the outcome of your discussion to the class.
- Write a report on the representation of gender in a specific medium of your choice, such as television, film or new media. Explain the representations you have chosen, identifying key features and recognising the qualities that each of them has. Analyse how each of the representations operates, breaking them down into constituent parts and separating out the codes and conventions used. Interpret the connotations of each part of the representation. Appraise the status of the representation by collecting real-world statistics to compare actuality with the media representation. Draw conclusions about the accuracy and worth of the representation. Synthesise an edited montage of the representation of males and females over time, using imagery from a collection of movies, and solving conceptual, creative or technical problems as they arise. Scan DVD covers, create movie stills using a capture program or download images to build the moving-image media production.

End of section activities

Marzano's cognitions and the syllabus underpinning factors are structured into the student activities. Each activity is based around one of the key cognitions used in the syllabus. The activity sentence stem begins with the cognitive verb. The activity then pushes students to explore the full potential of the cognition by taking them through the enabling aspects of the cognition and key supporting concepts as listed in the syllabus. Each activity is also designed to reflect the syllabus underpinning factors of literacy, numeracy and the 21st-century skills (such as collaboration or critical thinking).

The activities sections take two approaches to supporting students in acquiring and developing the knowledge and skills they will need to be successful in Film, Television and New Media.

The 'vertical' approach moves students along the question and the cognition. In this approach, the cognitive verbs are stacked vertically as separate skills to be developed through a task that has several independent components. Enabling aspects and key supporting concepts are identified in brown. This ensures students explore all aspects of the cognition.

The 'horizontal' approach, usually in a table, moves students in a logical progression across the page. The cognitive verbs are interrelated in a developmental way to the core task of the activity. Students perform developmental cognitive tasks on the same 'umbrella' concept. As with the vertical approach, enabling aspects and key supporting concepts are identified in brown, ensuring the cognition is fully explored.

Making and responding

The ‘Making and responding’ sections address student assessment outcomes. These sections are designed to provide students with the practical information they need to complete formative and summative assessment tasks. Information about both written, pre-production and production tasks is provided.

Using the book for exam study

The exams can be a stressful time for Year 12 students. Doing well in an exam depends on several attributes:

- having good subject understandings within the five key concepts
- being able to flexibly apply those understandings in processes related to unseen exam questions
- developing good organisational skills
- enhancing memory skills through spaced repetition.

This textbook provides a comprehensive subject knowledge and helps to develop skills in each of the syllabus objectives. It is ideal for private study.

NelsonNet

NelsonNet is a protected portal to the premium digital resources for Nelson textbooks located at www.nelsonnet.com.au. Once your registration is complete, you will have access to digital content to supplement and complement each chapter, including activity sheets and weblinks. Icons in your NelsonNetBook will link you to these resources.

Teachers will have access to these resources plus teaching programs in Word and PDF formats, stimulus material for helping students develop their work and a PDF version of the student book.

Disclaimer

Please note that complimentary access to NelsonNet and the NelsonNetBook is only available to teachers who use the accompanying student book as a core educational resource in their classroom. Contact your Education Consultant for information about access codes and conditions.
